# Elsevier and open science

## Data

We help researchers to **store, share, discover**, and re-use research data

## Sharing

We are actively supporting researchers who wish to share content and data, via **journals, platforms** and **SCNs**

## Citizen science

Bridging the gap between the lab and the general public

## Measuring Research Impact

A diversity of metrics is essential; metrics should be **transparent, valid** and **replicable**

We provide OS services for the entire research cycle, based on a **sound understanding of researcher, funder and other stakeholders' needs** and in adherence to **quality** and **research integrity** standards

# Elsevier and open access

- **Actively engage**
  - Support both gold and green OA
- **Development & partnering**
  - Developing systems and technology to implement OA
  - Working with funders, institutions and authors
- **Offer choice**
  - Respect academic freedom of authors
  - Offer various ways for authors to comply with funder and institutional policies
  - Maintain focus on quality

**400+**

Open access journals

**1600+**

Hybrid journals

**All journals**

Offer green OA options

## Gold open access

- Launching a new OA journal every other month, and all established journals offer OA options
- Choice of either a commercial (CC BY) or non-commercial (CC-BY-NC-ND) user license.
- Article publishing charges (APCs) range from 500- 5000

## Green open access

- All journals offer authors an option to self archive
- ‘*Share link service*’ provides free access to recently published research
- Partner in the CHORUS initiative with US federal funding agencies
- Open archives in 100+ journals, incl. Cell Press titles after 12 months.
