

# THE CIRCULAR ECONOMY PACKAGE

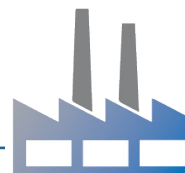

## EU Action Plan for the Circular Economy

- Revised EU regulation fertilizers
- Minimum requirement re-used water
- Interface chemicals, products, waste
- Electronic Info system on cross-border waste transfers
- Quality standards for secondary raw material

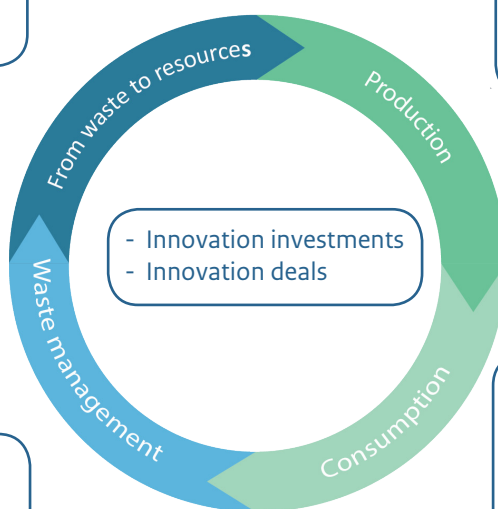

- MS to promote sustainable sourcing

- Requirement for product reparability
- Coherent product policy framework
- BREFs for CE in industrial sectors
- Facilitate industrial symbiosis
- SME support to substitute hazardous substances and for advanced manufacturing technologies
- EMAS and ETV

- Legislative package on waste
- MS and COM to avoid overcapacities in waste treatment and improve waste management plans
- Cohesion policy aligned to waste hierarchy

- Encourage reuse activities
- Enforcement of 2-year guarantees
- Action on false green claims
- Eco-design for repair and spare parts
- Repair info requirements
- Better EU Eco-labelling
- Testing for planned obsolescence
- Product Environmental Footprint
- CE in Green Public Procurement

### Variety of policy measures

- Legislation
- Implementation support
- Voluntary approaches
- Better information
- European funding

### Best practices

- MS to introduce economic instruments aligned to waste hierarchy

### Waste legislation amendments

- Definitions of municipal waste
- Definition of food waste
- Simplification of reporting
- Exemptions from SMEs
- Preparation for reuse
- New calculations rules for recognised re-use centres and products, and metal recycling from energy recovery
- Better data by quality check and national electronic registers
- New targets for municipal waste recycling
- New targets for municipal waste landfilling
- New targets for packaging waste recycling
- Prevention of food waste, textile, WEEE, furniture
- Prevention of incineration (by target)
- Prevention by Extended Producer Responsibility

### How to measure progress

- Resource Eff. Scoreboard
- Raw Materials Scoreboard
- New monitoring framework

### Priority sectors

- Plastics
- Food waste
- Critical raw materials
- Construction & demolition
- Biomass & bio-based products

### Disclaimer

- For quick reference only at the CE stakeholders meeting 25-01-2016
- For exact formulation of actions, see the Circular Economy Action Plan
